

IMMACULATE CHEPKIRUI

SOFTWARE ENGINEER

LinkedIn || GitHub || Email || Portfolio

Personal Statement

Software Engineer with experience developing modern web applications, designing intuitive user interfaces, and delivering user-centered digital solutions. Skilled in React, Next.js, TypeScript, and UI/UX design, with a strong foundation in building responsive, scalable, and maintainable applications. Passionate about solving real-world problems, learning emerging technologies, and collaborating with cross-functional teams to create impactful products.

Education

AkiraChix

CodeHive: Diploma in Information Technology

February 2025 - November 2025

Relevant Courses

- Data and Machine Learning
- UI/UX Design
- Quality Assurance
- Frontend Web Development
- Backend Development
- Product Management
- Mobile Development
- User Experience Research

Projects

CraftCrest, Marketplace Platform for Kenyan Artisans and Buyers

- Took part in user research, including desk and field research, a literature review, and an analysis report, to guide the design and features of the platform.
- Designed the brand identity, wireframes, and mockups in Figma, then built and maintained the web application using React.js, Node.js, and PostgreSQL, including M Pesa payment integration, while resolving software, API, and database issues.
- Configured application environments, managed version control with Git, supported deployment, and carried out QA testing, including test cases and test plans, to catch bugs and improve system reliability and usability.

CoopConnect, Digital Platform for Cooperative Farmers

- Took part in user research and produced a research report to guide the design and features of a platform helping Rwandan farmers access training and earn reward points.
- Designed the user interface in Figma and system architecture, then built the informational website using HTML, CSS, and JavaScript, and the platform using Django and React.js, handling development and deployment.
- Carried out QA testing, including test cases and documentation, to catch bugs and confirm system reliability and usability.

Experience

Graphic & UI/UX Design Intern - ESAK **FEB 2026**

- Redesigned the company's brand manual and rebuilt the WordPress website, including updated speaker profiles and event programs.
- Translated technical electricity and tariff concepts into clear, consumer friendly infographics and visual briefs for the Time of Use (TOU) campaign, supporting policy advocacy and regulatory consultations.
- Designed a consistent visual identity across social media, newsletters, and event materials, including branding, digital programs, and presentation decks for forums, workshops, and webinars.
- Built Google Forms for C&I conference registration, payment, and attendance tracking, and a post event feedback form to capture attendee experience.
- Created FAQs, briefs, and post event summary reports to support communication with consumers, policymakers, and members.
